SECRET

CURRENT INTEREST ITEMS -- IIS SOFTWARE DEVELOPMENT

ITEM	ACTION

● GENERAL COMMENT - Since 10 October 1968, the UAC effort (in support of Software Development) has been non-existent. It is being felt - and we can't escape the fact that unless soon remedied, our ability to properly react to -
  ● Specification revision/corrections
  ● Incorporation of new requirements
  ● Etc.
will be seriously hampered. This condition will cause corresponding implementation slippages, revisions to overall developmental effort, planning and scheduling and is certain to add dollar costs to the program.
	1. Press UAC to move as rapidly as possible in:
	
	  A. Procurement of [_____] type **25X1** services.
	  B. Procurement and training of suitable replacement/backup personnel.
	  C. Getting reinvolved in the IIS as quickly as possible.
	
	2. We must do everything possible to:
	
	  A. Obtain Security Clearances.
	  B. Help their new people in assimilating the necessary knowledge (over and above what they can do by themselves).

● OVERALL STATUS.	Shaky, but moving ahead.
